Project Title
Project Overview (maximum 100 words)

Please prepare the information requested on the second page. Please note the project title, principal investigator and page number at the top of each page.

Please include the following information in either Word or Acrobat (.pdf) format. Be sure to include the cover page to complete your research application. Please note the project title, principal investigator and page number at the top of each page.

Proposal Narrative (maximum 3,500 words)

A. Significance

- A statement of the objectives and significance of the proposed research activity.

B. Background

- A summary of previous published research relating to the proposed research.
- A summary of previous research, writing, or practical experience by the applicant(s) and its relationship to the proposed study.

C. Methods

- A detailed methodology including the number of subjects to be included, method of subject recruitment and selection, data to be collected, data analysis process, and plans for public presentation or publication of data. Include the roles of all personnel involved and plans for access to any special resources.
- Timeline of proposed project

Budget

- Include a detailed list of expenses

Human Subject Approval

Should your research project be accepted, you will be expected to receive approval by an Ethics Review Board or other such Human Research Review Committee (HRRC). These review boards are often an established part of an institution, college or university. There are also privately run HRRCs. These ethics review committees serve to ensure the safety, anonymity and right to full disclosure for subjects involved in original research. If using human subjects, please briefly describe how you plan to seek approval for the use of human subjects or if you will need assistance with this aspect of your project.

Principle Investigator Bios

- Write a brief biographical sketch for each investigator highlighting all experience relating to the proposed research project. Include training course and year of certification and relevant education including school, year of graduation, degree attained, and area of study.
- *As a separate document*, include a curriculum vita (CV)for each investigator

Please submit the application and CVs in word or Acrobat (.pdf) format, 12pt Times font. Headings should clearly separate each section and subsection of the application. Provide as much detail as possible within the word limitations. Questions regarding the application or the review process should be directed to Heidi Leathwood, Chair of the AmSAT Research Committee (heidi.leathwood@gmail.com). Final applications and CVs should be submitted to info@Amsatonline.org by November 1, 2019.
